PROFESSIONAL SUMMARY

I am a **Systems Development Technician** from SENAI and ETEC, and I am finishing my bachelor's degree in **Software Engineering**. **Full Stack** Developer focused on systems architecture, **scalable RESTful APIs** and process automation. What I do well is turn manual operations and fragmented systems into an in-house, integrated platform. I have built from scratch a system that runs a company end to end, from the e-commerce order to shipping with invoicing integrated into a dedicated in-house system, using **Next.js, NestJS and TypeScript**, replacing legacy WordPress systems without stopping operations.

Back-end is where I have the most experience. In consulting roles, I delivered APIs in **Node.js and NestJS** with **Clean Architecture** for more than **20 client projects** in domains such as agribusiness, healthcare, financial management and logistics, a context that got me used to handling complex business rules and requirements gathered directly with clients in meetings.

I have integrated **ERPs** (BLING, OMIE, ERPFLEX, Datasul/TOTVS), built **workflow automation** (n8n), **web scraping and automation**, and I work with relational and non-relational databases (**PostgreSQL, MySQL, MongoDB**), cloud (**AWS, Azure**) and infrastructure (**VPS, Docker, Nginx**).

My Portfolio: <https://portfoliodev-yhagofelipe.vercel.app>

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, PHP, SQL

Front-end: React.js, Next.js, React Native, Angular, Redux, Tailwind CSS, Bootstrap, HTML5, CSS3/SASS

Back-end: Node.js, NestJS, Express, FastAPI, Flask, REST APIs, JWT/OAuth2/RBAC, Prisma/TypeORM, Redis/BullMQ

Databases: PostgreSQL, MySQL, SQL Server, MongoDB, SQLite, Supabase

DevOps & Cloud: Docker/Docker Compose, Nginx, Linux/Bash, VPS, CI/CD (GitHub Actions), AWS, Azure, Firebase

Automation & AI: Web scraping (Playwright, Puppeteer, Selenium, BeautifulSoup), n8n, LLMs/Generative AI

Integrations: ERPs (BLING, OMIE, ERPFLEX, Datasul/TOTVS), CRM (RD Station), WooCommerce

Data & BI: Power BI, Pandas, Jupyter, Streamlit, Azure Databricks

Practices: Clean Architecture, TDD, MVC, Scrum, Kanban, Application Security

Tools: Git/GitHub, Figma, Postman, WordPress

PROFESSIONAL EXPERIENCE

Freecook Brasil

Campinas, SP (On-site)

Full-Stack Software Developer - CLT (Full-time)

Mar 2026 – Present

- Architected and built from scratch the digital platform that runs operations end to end, from the customer's e-commerce order to inventory write-off, covering the **online store, admin panel, sales portal and corporate website** in a single integrated system.
- Led the company's migration from legacy **WordPress** to an in-house stack in **Next.js, NestJS and TypeScript**, defining code standards, API structure and a migration strategy with no operational downtime.
- Back-end development in **PHP/MySQL** for the legacy e-commerce during the transition, with custom modules and integrations for specific business needs.
- Designed automations with **n8n**, orchestrating flows between ERP, CRM (RD Station) and internal systems to eliminate manual processes in marketing and operations.
- Migrated the integration from the legacy ERP (**ERPFLEX**) to the current ERP (**OMIE**), ensuring consistency of inventory, order and customer data during the transition.
- File storage via **Amazon S3** with presigned URLs; management of in-house infrastructure (**VPS, Docker, Nginx, SSL**) with automated backups and a data recovery strategy.
- Integration with payment gateways, REST APIs and logistics systems (FRENET).

CroSoftem Tecnologia

São Paulo, SP (Remote)

Back-End Software Developer – Contractor

Jan 2026 – Aug 2026

- Development and maintenance of **scalable RESTful APIs** in a corporate environment, serving more than **20 projects** for different clients.
- API architecture with **Node.js, NestJS and TypeScript**, applying **Clean Architecture** to ensure maintainability and scalability in long-term projects.
- Implementation of complex business rules, authentication/authorization and integration with multiple external APIs.
- Complete technical documentation via **Swagger**, enabling simultaneous consumption by mobile (**iOS**) and front-end (**Angular**) applications.
- Worked directly with clients on requirements gathering and technical scope definition, within agile methodologies (**Scrum/Kanban**).
- Projects delivered across a variety of domains: agribusiness (Vitrine do Campo), healthcare (Cardio Shop), financial management (SAFE/ERICA) and logistics (Ships Manager), among others.

DBS System Consultoria

Full-Stack Software Developer – Contractor

Campinas, SP (Remote)

Sep 2025 – Dec 2025

- Modernization of legacy corporate applications for an industrial environment, replacing manual workflows with automated API integrations.
- Rebuilt integrations with the **Datasul ERP (TOTVS)**, replacing manual data exchanges with direct API consumption and reducing the risk of inconsistency between systems.
- Development of RESTful APIs in **PHP and Node.js**, with persistence in **MySQL and PostgreSQL**, to support the new integrations.
- Rebuilt legacy interfaces with **Next.js and TypeScript**, modernizing the experience without interrupting production operations.
- Delivered the project within a contract of only 4 months, with full autonomy over technical decisions and schedule.

Grupo EMS

IT Apprentice – CLT (Full-time)

Hortolândia, SP (On-site)

Jan 2025 – Sep 2025

- First corporate experience, on the **Cybersecurity** team, focused on internal process automation and data protection.
- Development of internal applications in **Python (Streamlit, FastAPI, Flask)** to support specific needs of the security area.
- Created automations that reduced the team’s manual operations time by **40%**, my first real contact with the idea of “automate before you scale”.
- Set up simple pipelines (**CI/CD**) and integration with multiple databases (Supabase, Firebase, PostgreSQL, MySQL) to consolidate data flow between systems.

SELECTED DELIVERED PROJECTS

SafetyKeeper – Occupational Health and Safety Management System

May 2026 – Jun 2026

NestJS, TypeScript, Next.js, PostgreSQL

Client: JCFireWall

- Occupational Health and Safety management platform for a company serving multiple corporate clients, replacing spreadsheet-based control with a system featuring an audit trail.
- Modular back-end in **NestJS**, with **multi-tenancy** (data isolation per company), **RBAC** by user profile and persistence in **PostgreSQL** with modeling geared toward compliance and history queries.
- Front-end in **Next.js** for document management, expiration tracking and compliance status. Deployed on a **VPS** with Docker, Nginx, SSL and automated backups.

CUBE – Political Analysis Platform

Jul 2025 – Nov 2025

React, TypeScript, Node.js, Prisma, PostgreSQL, Gemini AI

Client: CUBE Inteligência

- Full-stack platform for real-time monitoring of political mentions, with analytical dashboards sized for traffic peaks during election periods and distinct permissions for internal users and clients.
- Layered back-end in **Node.js/Express**, **Prisma ORM** with PostgreSQL, **JWT** authentication with refresh token rotation, per-route **RBAC** and validation with Zod.
- Sentiment analysis via the **Google Gemini API**, public data collection with **Apify**, RSS aggregator with a scheduler (node-cron). Deployed on a **VPS** with Nginx and **PM2** in cluster mode.

Landing Page – Labor Law Firm

Sep 2025 – Oct 2025

React, TypeScript, Vite, Tailwind CSS, Vercel

Client: Raquel Ribeiro Advocacia

- Organic lead-generation page translated into technical performance and SEO requirements: **LCP < 2.5s**, **Lighthouse > 95** in all categories, semantic HTML and schema.org structured data.
- **WCAG 2.1 Level A** accessibility, mobile-first layout and deployment on **Hostinger** with CI/CD via Git and preview deployments on every Pull Request.

MundoPet – E-commerce Marketplace (Capstone Project)

2024

Node.js, Express, React, Redux, MongoDB

ETEC Hortolândia

- Marketplace for the pet market, developed as the capstone project of the Systems Development technical program, with a Node.js/Express back-end, MongoDB persistence and a React front-end with Redux.

EDUCATION

Universidade Presbiteriana Mackenzie

Programa Cidadão Pró-Mundo (CPM) – English

Campinas, SP

Jul 2025 – Dec 2029

Centro Universitário Estácio de Sá

Bachelor’s Degree in Software Engineering

Remote

Jan 2025 – Dec 2028

SENAI São Paulo “Dr. Celso Charuri”

Systems Development Technician

Sumaré, SP

Jan 2025 – Sep 2025

ETEC Hortolândia

Systems Development Technician + High School

Hortolândia, SP

Jan 2022 – Dec 2024

CERTIFICATIONS

Microsoft Azure Fundamentals: Cloud Services Deployment AZ-900 (SENAI), AI Services Deployment in the Cloud AI-900 (SENAI), Cloud Security Fundamentals SC-900 (SENAI)

Development: Full Stack Web with Node, JavaScript and TypeScript (Udemy), Node.js Fundamentals Track (DIO), JavaScript Developer Track (DIO), PHP Experience Track (DIO), Programming Logic Track (DIO)

Python & Data Science: Python Language Fundamentals for Data Analysis and Data Science – Introductory, Basic and Intermediate Levels (Data Science Academy), Python Essentials 1 (Cisco), Python Programming (SENAI), Python Fundamentals (SENAI)

Cloud & DevOps: Microsoft AI for Tech Azure Databricks (DIO), Linux Fundamentals Track (DIO)

Databases & BI: Databases for Data Science (SENAI), Microsoft Power BI (SENAI), Oracle APEX Foundations (Oracle)

UX/UI Design: UX and UI Design (SENAI), UX Designer Track (DIO)
